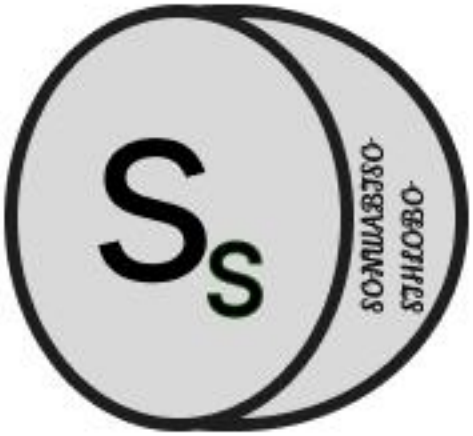
# *DESIGNING MYSELF*

1. ***PERSONAL IDENTITY SYSTEM***

***LOGOMARK***



2. **SUPPORTING INFOGRAPHIC**

**What I care about?**

**I care about technology, problem solving, and creating software's that help people solve really world problems.**

**Personal Identity**

**The "Ss" In the center represent my Name Sonwabiso Sihlobo. It shows ownership my work. It helps people to recognize my personal brand as an Information Technology Student.**

**Professional Identity**

**I am a dedicated Information Technology student with a strong interest in Software Engineering and Cyber Security. I love solving real world problems using technology and also create solutions.**

**Why my logomark looks the way it does**

**The double S's in my logo represent my name and my surname (Sonwabiso Sihlobo). The circle represents my journey in Information Technology. Learning never stops, and I will continue developing my skills as I work towards becoming a Software Engineer and later moving into Cyber Security.**

3. **BRIEF REFLECTION**

   The hardest part was deciding which logo should represent me. I had many ideas at first. One of the options was a shield logo because I am interested in Cyber Security. The shield would have represented protecting data and systems. However, I decided not to use the shield and instead chose the Ss logo that I designed. I removed the shield because the Ss logo represents me more personally, since it is based on my initials. This design shows my identity and my journey in technology. It represents who I am as an IT student who is working towards becoming a Software Engineer and later specializing in Cyber Security
