ASSIGNMENT 2

WEBSITE REDISGN

The website that I choose to redesign is the **Takealot** website.

IMPROVEMENTS TO THE EXISTING WEBSITE

The following are the things that needed to be improved in the Takealot website -:-

1. **Layout and Structure**
   The current website can be improved by making the homepage simpler and more organized. Currently, the homepage displays many sections, advertisements and product lists at the same time. This make the page to look crowded and confusing for users. The design that I designed show only important sections first, such as Logo, search bar, categories, my account, Login and register at the top of the page.

   Grouping product into clear sections like Recommended Product, Categories and Services will make the website easier for users to understand.

2. **Navigation and Information Flow**
   The current website shows many links and departments, which can sometimes confuse users.

   The improved website have a simple navigation:
   - The search bar
   - Product categories
   - Their account
   - Their shopping cart
   - The Click Here to Show by Department button. If the user clicks this button it will display all the options under it on new page, then the user can select from those option.

3. **The Visual Theme and Consistency**
   The current Takealot website users the white background which is commonly used by many websites.

On the redesigned website I choose to use a Dark blue background and light blue fonts which are not commonly used by many websites.

4. **User Experience Across Devices**
   The redesigned website is designed in such a way that it can work well on different screen sizes, not only on computers.

   For Example:
   - On mobile devices the categories may be displayed in vertical list
   - Also the product images will resize to fit the screen
   - Buttons will also resize when using mobile device.

TAKEALOT WEBSITE REDESIGN SPECIFICATION

- **Current Site Evaluation**
  The Takealot website is one of the biggest online shopping websites. Users can many different items such as, Clothes, electronics, groceries and other home items. The website does work well, but there are also some problems that make it difficult for users.

  STRENGTHS
  - One of the strength of the website is that it contains many product. Meaning, users can navigate many items in one place. The search also assist users to quickly find what they are looking for.
  - The website offers important services such as Secure Payments, Delivery Services and return option, which are easy to locate.

  WEAKNESSES
  - The homepage offers too many information at once which can be confusing to users. Immediately when people enter the website a lot of information is being displayed.

  - The SHOP BY DEPARTMENT section shows many categories on the left side of the page. This make the homepage to be overcrowded and also be like it contains a lot of information.

- The Mobile App Download links are placed at the bottom on the page. Many people prefer to use the mobile app instead of directly using the website. So, this links should be placed above so that when the user immediately enters the website can see them.
- The company information ("Takealot Online (Pty) Ltd.") is placed at the bottom of the page. Some users prefer to see company information earlier in order for them to be sure that the website is legit or not.

- **REDISIGN OBJECTIVES**

  The main purpose or goal of the redesign is to make the website simple, easier and customer interacting to user.

  The redesign aims to:
  - Make the homepage cleaner less crowded
  - Improve the navigation
  - Create a unique visual style e.g. Dark blue background
  - Make important feature available to see

- **PROPOSED CHANGES**

  The redesigned homepage has simple and clear layout.
  - At the top of the page there is the logo, search bar, and account options such as login, wishlist, and cart. This allows users to quickly access important features.
  - Below the header there is a large banner showing special deals, such as discounts or promotions.
  - Under the banner there is a "Shop by Category" section. This section shows categories like sports, perfumes, technology, clothes, and groceries. Each category has an image to help users understand it quickly.
  - The page also shows a recommended products section. This section displays products like headphones, monitors, smart watches, laptops, and computer accessories. Each product shows the price and rating.
  - A Chatbot that the user will chat with, that is programmed to answer most frequently asked questions.

  Another section shows important services such as:

  - Fast Delivery
  - Online Returns
  - Secure Payments
  - Data Protection

  Navigation and Information Flow

  The redesigned website improve the way user move around the website.

  Instead of showing many departments on the side, the redesign focuses on clear categories.

Users can to the following:

. Click category to browse items or product

. Use Search bars for product searching

Visual Theme and Consistency

The redesigned that I designed uses a Dark Blue and Purple Gradient Theme. This shows that a website uses a unique theme instead of using white that is mainly used by many websites

Content Structure

- Header and Navigation
- Promotion banner
- Product categories
- Recommended product
- Service section
- Social media links

This structure assist the users to easily understand website and be able to find what they need.

- **DESIGN RATIONALE**
  - The design decisions were to make the website simpler, easier to use and Unique from other websites.
  - Reducing too much information on the homepage
  - Help users to focus on important things
  - The Theme is consistent which makes the website to look professional and easier for users to read.

- **IMPLEMETATIONS CONSIDERATIONS**

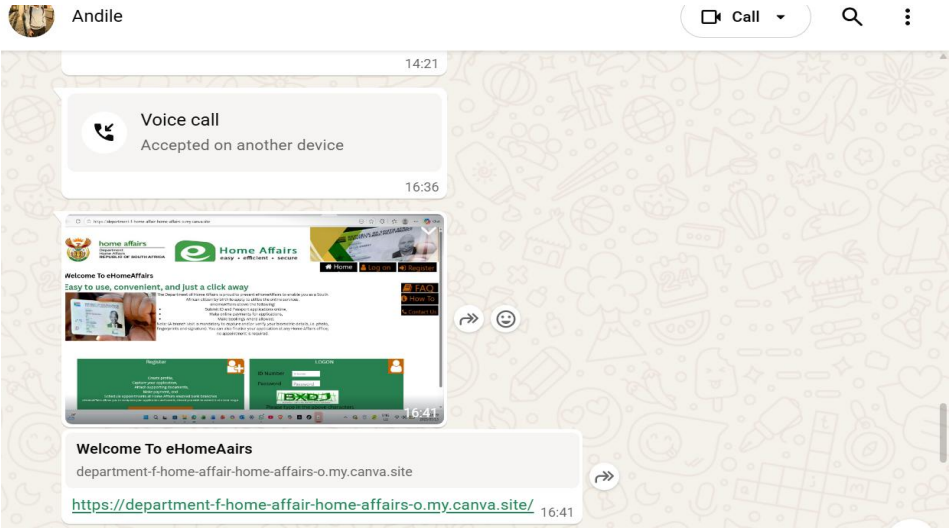
  Responsiveness:
  This website should work well on phones and computers. The layout will automatically adjust if the user navigate the website using the phone.

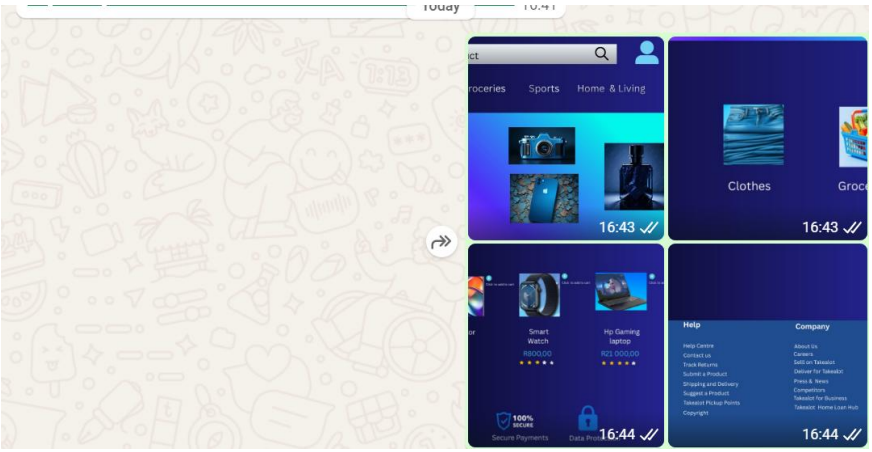
  Accessibility:
  The website will be accessible to different users. Text should be easy to read. The color accommodate users, because it follows the same theme.

  Maintenance:
  The website should be easy to update. Administrators should be able to add new product, promotions and categories without being required to change the whole website.

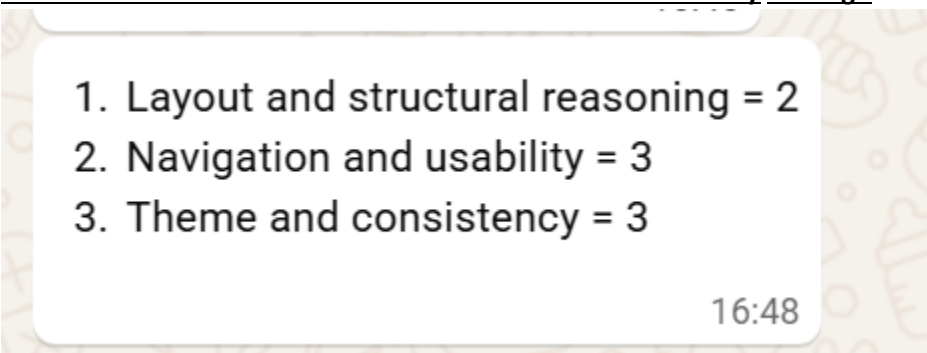
PEER REVIEW

The Student that I review the work for is Andile Jali





This is the feedback that I received from the student about my redesign



1. Layout and structural reasoning = 2
2. Navigation and usability = 3
3. Theme and consistency = 3
